WORK EXPERIENCE

Python Developer Intern

Autonomous Technology Pvt. Ltd (2025 Nov - Mar 2026)

- Built and maintained backend APIs for a CRM system using Django & Django REST Framework.
- Designed and optimized database models and queries for efficient data handling. Live project : <https://crm.autonomoustechnology.net/>

PROJECTS

Complaint Management System

(Django, DRF, PostgreSQL, Redis, JWT, Google Auth)

Developed a web-based employee management platform featuring user authentication, role management, attendance tracking, and reporting modules.

<https://complaint-mgmnt-sys.vercel.app>

Stock Prediction Portal

(Django, React, TensorFlow, Keras, Pandas, Matplotlib)

Built a stock prediction portal with AI-based forecasting using TensorFlow/Keras, visualized trends with charts, and integrated a React frontend with Django backend.

<https://github.com/Govindaspkta/stock-prediction-portal>

Travelling Application

(Django, HTML, CSS)

Developed a travel booking app for flights, buses, and trains with filtering by destination, price, and source, secure user authentication, Django Admin for managing routes and bookings, and a responsive UI with form validation.

<https://github.com/Govindaspkta/Travel-Booking-Application>

Quiz Master

(Flask, React, Ionic, MySQL)

Developed a mobile-friendly quiz app with authentication, real-time score tracking, and a responsive UI for smooth user experience.

<https://github.com/Govindaspkta/Quiz-Master>

Online Bookstore

(PHP, MySQL, HTML, CSS)

Built an online bookstore with user authentication, checkout system, and admin panel for managing books and authors, supported by a secure MySQL database schema.
